### **SMART First Aid & Fire Fighting Training**

Dear Andrew,

I would just like to take this opportunity to thank you for yet again making the long drive to Botswana to undertake the training of my staff in their First Aid Level 1 and Basic Fire Fighting (domestic & wild) Courses during this year.

Both these courses have elevated the staff and made them extremely positive towards their work and the company. This has helped us to ensure that we remain compliant with all our legal requirements, insurance requirements and staff training requirements.

You have the most amazing ability to work with people from all walks of life from management down to basic farm labourer and to be able to get them to all understand the importance and fundamentals of all your courses.

I would highly recommend you and your courses to any facility looking for these types of training courses for management, guests and staff alike. Due to your professionalism, punctuality and commitment to striving for excellence I would most certainly use you and your company again should I require these services. This is exactly why I have over the years used SMART (Andrew) to undertake all my courses in all the different parts of the African continent on which I have worked.

Andrew, keep up this level of enthusiasm, hard work and unbelievable teaching ability, you are changing more lives than you can ever actually imagine.

Yours sincerely,

**Bradley Schroder**  
**General Manager**
