

Fire Fighting and Prevention Training

Fire is a hazard. At any given time, it can endanger human life and ruin property. It is imperative that all businesses should have a fire fighting team and fire fighting equipment ready in case of unfortunate accidents.

The first thing people should do is educate themselves about how fire is generated and the elements that keep it alive. The classic knowledge says fire is produced when there is enough heat, fuel and oxygen. The appropriate combination of these three factors would produce fire. Elimination of any of these factors would, therefore, extinguish flames. But in case of large fires, extinguishing of fire is not easy, this could start anywhere and spread radically to any direction and could kill and injure people and render everything to ashes.

People should learn the basics when under such urgent situations. They should know emergency hotlines to call. Moreover, it is not enough to have fire safety gear and equipment. People should know how to use them. They would render useless to people who do not know how to use them when the situation arises. When the basic tasks are left undone, grim events happen in just a blink of an eye.

Why Fire Fighting Training?

Fire prevention, confinement, extinction as well as evacuation and alerting the fire department in an emergency situation are essential information for any corporate employee to have. This fire training course is ideal to equip corporate employees with the skills and knowledge needed to possibly prevent or contain any fire - these are actions that can save companies million of rands in damages. The purpose of this basic training course in fire awareness is to gain the skills and knowledge to identify, recognise, confine, contain and extinguish a fire.

Who should attend?

Any staff member selected to be part of the designated fire fighting team.

Fire Fighting and Prevention Training

This basic fire fighting course is designed to give attention to the following important topics: Chemistry of combustion, Sources of fires, Fire behaviour, and appropriate fire fighting equipment, Fire prevention and Evacuation. The skills of using the appropriate basic fire fighting equipment are also practiced. It promises to be an interactive, informative and interesting training course. The course consists of the following modules:

Course Content

- Theory of Fire
- Elements of Combustion
- Spread of Fire
- Extinction of Fire
- Classifications of Fire
- Hand-Held Fire Appliances
- Fire Appliance Inspection
- Practical Use of Fire Extinguishers

Course Duration

½ Day

Course Fee

R 359.00 per person

R 299.00 per person for a group of 10 or more

Included in the fee: Learner workbooks, practical use of a fire extinguisher, Certificate

Features of The S.M.A.R.T. Solution services

- Facilitators and trainers are recruited from the emergency services - this means that a facilitator with real-time practical experience in emergencies and life threatening situations facilitate the learner
- Extra modules can be added to the course at the clients request - thus allowing for the tailor making of the course content to suit the clients individual needs and requirements without deviating from the legal requirements and current DOL legislation
- Courses are structured on a 50% theory and 50% practical format and are all outcomes based - this ensures that each learner receives maximum hands-on practical instruction in the acquisition of specific psycho-motor skills, as well as a thorough cognitive understanding of the relevant theory, thereby enhancing the learners level of confidence and competence
- For First Aid training each learner receives their own "Personal Training Pack" for the duration of the course - this eliminates 'front-of-class' embarrassment, reduces the chance of cross-contamination and enhances personal hygiene
- Training is conducted nation-wide at no extra cost to the course attendance fee - this affords multi-national companies and organisations the opportunity to have employees and members trained countrywide, thus creating uniformity and standardization of knowledge within the organisation (Conditions Apply)
- We cater for all literacy levels - this enables learners from all social and business levels to attend our learning interventions
- We utilise a unique facilitating method with an "easy-to-learn" format - this method creates an accelerated learning curve and enhances long-term memory retention
- We pride ourselves on professionalism, reliability and punctuality - this will ensure that we will become the preferred service provider and quality assessor for first aid training

Terms and Conditions

- A minimum of ten (10) delegates will be charged for
- Maximum 15 delegates per instructor (for quality purposes)
- VAT is not applicable (application pending)
- Fuel, toll fees, accommodation and meals to be provided for the instructor/s for training conducted outside the Greater Johannesburg region (whichever applicable)
- Maximum certificate validity period for First Aid is 3yrs
- Maximum certificate validity period for Fire Fighting is 1yr
- All other certificates valid for 1yr
- Full payment is required five (5) working days prior to the start of training
